WISCONSIN DARTBALL · PREVIEW TESTING · NOVEMBER 2026

DARTBALL TEST DRIVE

The new website and apps are running on **real dartball data**: your leagues, your teams, your history, and your own account. They're not live yet. Before they are, we need people who know the sport to open them up and tell us what's wrong. Here's how to get in, and what we'd like you to look at.

EVERYONE

WEBSITE & FAN ZONE

1 OPEN THE WEBSITE

Point your phone's camera at the code, or type the address into any browser. Try it on a phone and a computer if you can.

THE PREVIEW WEBSITE

`https://dartball3.azurewebsites.net`

Bookmark it. This is where the apps send their data, so you'll want it open beside them.

2 SIGN IN WITH THE ACCOUNT YOU ALREADY HAVE

Your account came across with everything else. Use **Sign in** with the **same email and password** you use on the current dartball site. Your roles came too, so if you're an officer or a director there, you're one here. The same sign-in works in Fan Zone and Dugout.

If your password isn't accepted, use **Forgot password?** on the sign-in page; a few hundred of the oldest accounts never had a password stored, and that fixes them. If your email isn't recognized, you never had an account: use **Register** (on the website, or Create an account in Fan Zone) and confirm it from the email you'll get.

> PREVIEW ACCOUNTS DON'T CARRY OVER
>
> At go-live the site starts again from the current site's accounts. An account you **create** during the preview, or a password you **change**, won't come with it: you'll sign in with your current-site password, or register again.
>
> And if anything asks for a card, **don't enter one**. Tell us instead.

> THIS IS HOW IT WILL WORK AT GO-LIVE
>
> Nobody who has an account on the current site has to make a new one when the real site changes over. If your current password works for you now, it works then, and if it doesn't, we'd much rather hear about it now.

3 GET THE NEW FAN ZONE

Android: scan the code, or open the website and go to **About → Get the Apps**, and tap **Download for Android** under Fan Zone. It installs **alongside** the Fan Zone you have now. Android will ask you to allow installs from this source; say yes.

GET THE APPS (ANDROID)

`dartball3.azurewebsites.net/about/get-the-apps`

This page always has the current build, so keep this code.

iPhone and iPad: the new Fan Zone is waiting on Apple's review. To try it now through Apple's **TestFlight**, ask through the website's **Support** page and we'll send you an invitation.

SCOREKEEPERS

LEAGUE & TEAM ADMINS

4 INSTALL DARTBALL DUGOUT

IPHONE & IPAD: APP STORE

apps.apple.com/us/app/dartball-dugout/id6806731519

It's brand new, so App Store search may not find it yet. Use this link or code.

Android and Amazon Fire tablets: from the same **Get the Apps** page as Fan Zone. Fire tablets use **Dugout for Fire tablets**.

> DON'T UNINSTALL STATISTICIAN
>
> Dugout installs alongside it. If your league never paid for website sync, Statistician is still the only copy of your old data.

5 SET UP, THEN SCORE EVERY GAME TWICE

1. **League admins:** on each shared tablet, sign in to Dugout and add your league. Its teams, schedule and handicaps come down from the website.
2. Score each match in **Statistician as usual**, and in **Dugout** at the same time. Statistician and the current site stay the official record until go-live.
3. After the night, compare the new website's results, standings and stats with the current site's. Tell us about every difference.

> THE DATA IS A COPY FROM NOVEMBER 3
>
> Players added or matches moved on the current site since then aren't on the new one. Add a missing player with **+ Player** in Dugout, and enter schedule changes on the new website.

WHAT WE'D LIKE YOU TO TRY

You don't have to do all of it. **Start with your own league, your own team and your own name.** You know what those should say, which makes you far better at spotting a mistake than we are.

EVERYONE

- [ ] Sign in with your **existing password**. Did it let you straight in?
- [ ] Find your **league** and **team**. Names spelled right? The right teams in the league?
- [ ] Find **yourself** on a roster. Check your season and career stats against what you remember.
- [ ] Look up a season from years back. Do the standings and stat leaders match the old site?
- [ ] Open a past **tournament** and its bracket. Did it come out the way it really did?
- [ ] Try the site on a **phone** as well as a computer. Anything cut off or too small to tap?
- [ ] In Fan Zone, sign in, **follow your team** with the bell, and see whether the game alerts arrive on league night.
- [ ] Star a few **favorites** and check they show on the home screen and the website.

IF YOU KEEP THE BOOK

- [ ] Set up your **league and team in Dugout**. Where did it make you guess?
- [ ] Score a full match alongside Statistician. Watch for anything the old app did that this one doesn't.
- [ ] Try a **pinch hitter**, and start game two to see the lineup carry forward.
- [ ] Connect a **scoreboard** if you have one, and tell us which board it is.
- [ ] Put the phone in **airplane mode** mid-game, keep scoring, then turn it back on. Did everything reach the website?
- [ ] Check the finished game on the website: **scoresheet, box score and every player's line**.

LEAGUE OFFICERS

- [ ] Check your league's **handicap table** and the handicaps it gives each match.
- [ ] Pick your league's **result buttons** and see that the tablets pick them up.
- [ ] Add or remove a team, and move a player between rosters.
- [ ] Check **standings** after a night is in, especially home and away splits and any points rules your league uses.
- [ ] Post a piece of **news**, share the link, and see whether the preview looks right.

TOURNAMENT DIRECTORS

- [ ] Build a tournament: divisions, teams, rosters.
- [ ] Run a **round robin** and a **bracket** from Dugout, including with the phone off the network.
- [ ] Assign **board numbers** and check they show where teams will look.
- [ ] Use **Picture Taker** and confirm the photo reaches the website.

TELLING US WHAT YOU FIND

Email support@dartballwi.com, or use the **Support** page on the website. Small things are as welcome as big ones: a misspelled team name matters, and so does a button you couldn't find. In Dugout, **Settings → Diagnostics → Share** sends us what we need to see what went wrong.

What helps us most:

- Where you were
- What you did
- What happened
- What you expected
- Phone or computer
- A screenshot, if you can
