

DARTBALL

Flood Light Box and Dart Stand

The Flood Light Box is made of heavy wood and is designed to protect the flood light as well as keep the light on the dartboard and not in the umpires eyes. When properly placed the light will not shine in the eyes of either umpire even if they are standing right next to the board.

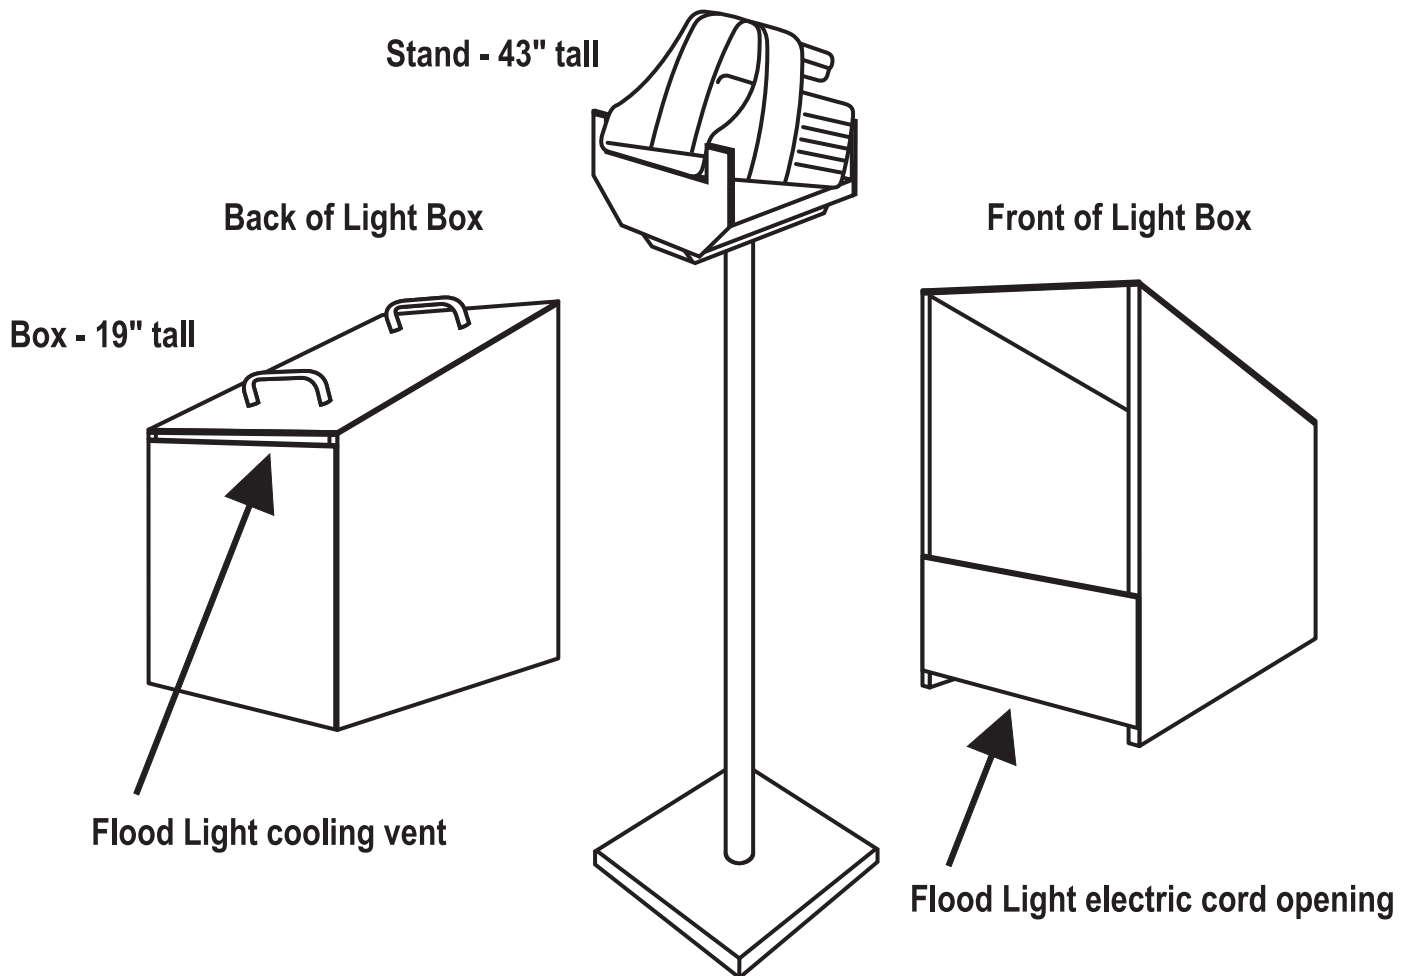

The box includes two metal handles.
Unpainted - \$35.00

The sturdy wood Dart Stand will hold the thrown darts in the handy plastic scoop during the inning. Place the stand near the umpire and after the last out of your side of the inning just take the scoop to the table at the throwing line. Then easily pour out the darts with very little damage to the dart feathers. The next umpire can then return the scoop to the stand for the next inning.

Unpainted, includes scoop - \$35.00

The box and stand can be painted in a color of your choice for an additional \$15.00 each.
The scoops come in 6 different colors - Black, Green, Red, Blue, Yellow or Pink.

A 500 watt Halogen light can also be purchased for an additional \$20.00.
